Enclosed is the reprint of an article by  and one of his senior analysts which appeared in the September issue of The American Economic Review. You will be particularly interested, since it presents a critical discussion of the paper on Soviet industrial production delivered by G. Warren Nutter at the 1957 AEA meetings.

We hope that you will be in Washington for the December meetings, and look forward to seeing you at that time.

25X1A9a Sincerely yours,
